## Top Scoring Sequences

Each of the following 250 sequences has an *E*-value less than 10.  
The motif matches shown have a position *p*-value less than 0.0001.  
**Hover the cursor** over the sequence name to view more information about a sequence.  
**Hover the cursor** over a motif for more information about the match.  
**Click on the arrow** (I) next to the *E*-value to see the sequence surrounding each match.

## INPUTS & SETTINGS

[Prev](#) [Next](#) [Top](#)

### Alphabet

**Background Source:** an old version of the NCBI non-redundant database

Name	Bg.				Bg.	Name
Adenine	0.274262	A	~	T	0.274262	Thymine
Cytosine	0.22521	C	~	G	0.22521	Guanine

### Sequences

The following sequence database was supplied to MAST.

Database	Sequence Count	Residue Count	Last Modified
SS_dmp_cpg_sequences.fasta	329	66129	Sat Jun 21 04:18:58 2025
<b>Total</b>	329	66129	

### Motifs

The following motif database was supplied to MAST.

Database	Last Modified
meme.xml	Sat Jun 21 06:37:19 2025

### Other Settings

<b>Strand Handling</b>	The result of scanning both strands is <b>combined</b> . When matches overlap the non-overlapping combination with the best p-value is shown.
<b>Max Correlation</b>	Motifs with a correlation greater than <b>0.6</b> are marked for potential removal dependant on the --remcorr option.
<b>Remove Correlated</b>	Correlated motifs exceeding the threshold are <b>highlighted</b> and their removal is recommended.
<b>Max Sequence E-value</b>	Sequences with an <i>E</i> -value less than <b>10</b> are included in the output.
<b>Adjust Hit p-value</b>	The hit <i>p</i> -value is <b>not adjusted</b> for the length of the sequence.

**Displayed Hits**  
**Displayed Weak Hits**

The  $p$ -value of a hit must be less than **0.0001** to be shown in the output.  
Weak hits are **not displayed**.
